

TCAssociates has expertise helping many U.S. government clients, spanning across many areas of Information Technology including: Enterprise Content Management, Enterprise Architecture Design and Implementation, Systems Integration, Service-Oriented Architecture Integration, Multiple Platform Support, Telecommunications, VOIP, Call Centers, Information Assurance, Automated Products Implementation and/or Evaluation, Program Management, Knowledge Management, Business Intelligence, Business Process Reengineering, Network Engineering, Application Development, Help Desk, Information Security Auditing, and Technology Solutions and Services.

TCAssociates also specializes in Information Assurance and IT Security Program Management for our clients following frameworks including, but not limited to, DIACAP, FISMA and National Institute of Standards and Technology (NIST) guidelines. TCAssociates understands the technical and management challenges of protecting and maintaining the integrity of information systems and data security. Our experience and expertise positioned us as trusted custodians of our client's platforms throughout numerous successful engagements. We provide appropriate levels of management, operation, and technical security controls to include: Management Security Evaluations, (Risk Assessments, Certification and Authorization Testing), Vulnerability and Risk Assessments (DIACAP, NIACAP, etc), Security Strategy and Planning, (Network, Firewall, Data), Forensic Security and Incident Response, System Penetration and Testing, and other relevant security-related planning, implementation, auditing, and certification activities.

Our engagements are executed under a Quality Management System framework and provisions risk mitigation strategies to minimize adverse impact to deliverables, budget and timelines. Our keen attention to Quality Assurance processes and procedures is a differentiator among other Information Assurance service providers. TCAssociates follows a mature structured approach modeled using Capability Maturity Model Integration level 3 guidelines.

The most valuable assets at TCAssociates are our employees. We recruit the best in the business, invest long term in formal training, mentorship and skills specialization and retain our employees by providing a challenging and attractive work environment and industry competitive compensation and benefits. Our employees are a testimony of the success of our approach. As Subject Matter Experts specialized in the above mentioned domains provide a reach back capability for our engagements and continuity throughout the performance period. This along with a continuously successful transition-in approach maximizes the retention of existing qualified personnel and provides increased value.

TCAssociates prides itself on being an "IT Solutions Portal" capable of addressing the full spectrum of IT related support and services through strategic partnerships.
